Description

One or more photo(s) has been virtually staged, AI generated or rendered. PRE-CONSTRUCTION — CONSTRUCTION HAS NOT YET STARTED. Discover the possibilities of a brand-new home with a thoughtfully designed floor plan offering approximately 1,787 square feet of air-conditioned living space, four bedrooms, two bathrooms and a two-car garage. The proposed design combines an open living and dining area with a split-bedroom layout, providing comfortable spaces for gathering and privacy when desired. The planned kitchen overlooks the main living areas and includes a dedicated pantry cabinet. Soaring 11-foot ceilings in the living and dining areas enhance the sense of openness, while sliding glass doors lead to a covered lanai—an inviting setting for outdoor dining or relaxing. The primary suite is designed with two walk-in closets and a private bathroom featuring dual sinks and a separate tub and shower. Three additional bedrooms, a full guest bathroom, and a dedicated laundry room complete the layout. With a planned 215-square-foot lanai and approximately 2,526 square feet of total building area, this proposed home offers a balance of indoor comfort and outdoor living. Home is offered as proposed construction. Plans and renderings depict the intended design, not a completed residence. Final specifications, finishes, features, pricing, and construction timeline must be confirmed with the builder and are subject to change.
